Access Control

Our custom designed systems allow you to control access to an entire building or restrict access to a single door. You decide how each individual's access should be restricted. Detailed reporting options show activity by selected criteria.

Sensitive areas—such as ATMS, money rooms, accounting offices, computer rooms, research and development areas, stock rooms, drug lockers, tool cribs and parking lots—call for restricted access.

Commercial Fire & Security can integrate access control and burglar alarm systems into one complete package, reducing cost and greatly increasing the security provided by independent systems. Our representative will work with you to select the hardware and software that you need, considering whether your management is on-site or off-site, architectural considerations, usage patterns, interfaces to burglar and fire alarms, and local building codes.

Access Control & Surveillance System Customer Benefits:

- **Track and deter access throughout your organization**
- **Provide auditing and time and attendance features**
- **Restrict access to sensitive areas**
- **Provide a safer working environment**
- **Avoid expensive re-keying when an employee leaves**
- **Remotely administer and control access to even thousands of facilities through one simple to operate interface**
- **Reduce insurance related claims**

A Commercial Fire & Security Access Control System is so Much More Secure than a Standard Lock and Key!

Today's electronic access control systems have to go far beyond simply locking and unlocking of doors. Your business needs a access control solution that can give you the control and information to run more efficiently.

Commercial Fire & Security Electronic Access Control Systems can help ensure that only the right people have access to your business, your records, your assets and also create a smart management tool. The proactive security and management features of electronic access control can benefit your business, no matter the size. Access Control is just as important to your bottom line as it is to your safety and security.
