

# Saving Time, Simplifying Compliance and Adhering to Local Regulations

Conducting timely inspections of your Fire Alarm systems – and gathering critical information about any deficiencies – is vital to any comprehensive life-safety strategy. It's also important to make inspection and deficiency reports readily available 24/7 to your staff so steps can be taken, as necessary, to address any issues and comply with Local Laws and Regulations. These reports are also typically requested by Authorities Having Jurisdiction (AHJ), the Joint Commission (for healthcare institutions), the local Fire Marshal and other regulatory agencies.

As a leader in life-safety services, Commercial Fire & Security has decades of experience, with customers across New York and New Jersey. We provide inspection, maintenance and reporting services for customers. We have likely encountered – and solved – virtually every kind of maintenance, inspection and code challenge.

# Inspection Reporting

Our inspection service can streamline the life-safety testing and inspection process and deliver more value to our customers. No matter your environment – healthcare, education, commerce, government, industrial, hospitality, or any other – there are likely to be fire alarms and sprinkler alarms that require regularly scheduled testing and inspection services. This means you can benefit from our testing and inspection service and Commercial Fire & Security can provide reporting for virtually all of your systems:

- Fire alarm systems
- Fire sprinkler monitoring
- Environmental and temperature monitoring

# Our Inspection Program

We get it! You want a worry free fire protection program from a company you can trust. That's why we created the Commercial Fire & Security Testing & Inspection Program; a program that provides complete compliance along with extraordinary benefits...all backed by our exclusive guarantee.

# Mandatory Fire Alarm Testing & Inspection

COMMERCIAL • INDUSTRIAL  
GOVERNMENTAL • RESIDENTIAL

## Our People

- All of our technicians have met state licensing requirements and Local AHJ certificate of fitness.
- We are staffed for 24-hour emergency support.
- If needed, we will take over communication and interaction with the AHJ/Fire Marshal on your behalf.
- You will be assigned a certified repair specialist when any of your devices are deficient or in need of correction. Our repair turnaround time exceeds the industry average.

## Our Process

- Technicians use our computerized record keeping software connected to our central database so that no equipment is missed during your inspection.
- Service reminder emails so you don't have to worry about forgetting to schedule an inspection.
- Archived inspection reports as well as electronic copies for your records.

## Our Promise

At Commercial Fire & Security, we are so confident in the inspections that we provide that we offer a Compliance Guarantee. This guarantee reflects the commitment that Commercial Fire & Security has made to providing perfect inspection service to its customers. Trust Commercial Fire & Security for your fire protection needs.

If after we inspect your Fire Alarm devices and the Fire Marshal determines you are out of compliance, we will:

- Re-inspect the device(s) within 48 hours
- Credit your account the original value of the inspection
- Perform a walk-through with the Fire Marshal

## Professionals Know Fire Alarms and What it Takes to Keep Them Operable

At Commercial Fire & Security, our technicians are experienced and trained in the testing, inspection, and maintenance of fire alarm systems to ensure code compliance and full functionality. Our training includes:

- Factory certifications for specific fire alarm types and manufacturers.
- Local certifications by state and local authorities.
- Third party certifications such as Underwriters Laboratories and NICET.

## Customer Benefits:

- **Simplification & Efficiency:** Simplifies the entire inspection and records-keeping process, by automating the documentation, reporting and maintenance of your inspection and inspection records.
- **Code & Regulatory Compliance:** Supports the efforts to comply with NFPA, the Local Fire Marshal, The Joint Commission requirements and other code and regulatory requirements across your fire and security systems.
- **Ease of Access to Critical Information:** Provides unlimited access to current and archived inspection reports.

## Meet Our Fire Service Technician

Our Service Technicians are the lifeblood of our organization. By hiring, training and deploying the most qualified technicians, we have set ourselves apart from the rest of the industry. Your professional Commercial Fire & Security technicians are always in uniform and easily identifiable.

## Experience

- Average industry experience of our technicians is 15 years.
- Over 90% of our advanced technicians have earned at least a NICET Level certification.

## Trustworthiness

- All technicians are thoroughly screened and their backgrounds checked throughout the hiring process.
- All technicians are accountable and guided by the Commercial Fire & Security Fire Protection Customer Service Promise.
